About Event

Bay Builders Hackathon is opening the doors to the agentic multiverse.

Everyone should register for the AWS Builder Loft using the link below and Please bring your Government issues physical ID to get access to the space

Registration Link: <https://events.builder.aws.com/aRP80I>

	Ayush Ojha	 
	Amitabh Das	
	Abhi	
	Robin M	 
	Melly	 
	Tony Chang	
	Build On	
	Finchip ai	
	Avinash Joshi	
	COco Wang	
	Harnoor Singh	 
	Juan Felipe Campos	
	Aviral	 
	Mansi More	

535 Went

Grace Bear, Elbion Redenica and 533 others

Build Your Own AI Company

In this hackathon, you're not just building an AI feature, you're building a full-fledged AI company. Think like founders: identify a real problem, design an AI-powered product, and create something users could actually adopt, trust, and pay for. Your goal is to turn an idea into a startup-style demo powered by AI agents, models, or workflows.

Track 1: AI SaaS Startup (B2B Tools)

Build an AI software company that solves a clear business problem. Your product should help companies save time, reduce costs, or improve decision-making.

Examples:

- AI sales assistant that writes follow-up emails and tracks leads
- HR AI that screens resumes and ranks candidates
- Finance AI that analyzes expenses and explains trends
- AI support agent that resolves customer tickets automatically

Track 2: AI Consumer Startup (Everyday Apps)

Create an AI-powered app for everyday users. Focus on personal productivity, lifestyle, learning, or entertainment.

Examples:

- AI study coach that turns notes into quizzes and revision plans
- AI fitness planner that creates workouts and meal routines
- AI dating coach that improves profiles and messages
- AI personal planner that schedules your day based on goals

Track 3: AI Agent Company (Autonomous Workers)

Build AI agents that can complete tasks end-to-end. These are not chatbots—they are “AI employees” that take goals and execute workflows.

Examples:

- AI marketing agent that creates and schedules social media campaigns
 - AI research agent that reads articles and writes summaries
 - AI recruiter agent that finds candidates and books interviews
 - AI travel agent that plans full trips based on preferences
-

Track 4: Vertical AI Company (Industry Specialists)

Focus on one industry and build a highly specialized AI product for it. Go deep instead of broad.

Examples:

- AI lawyer assistant that reviews contracts and finds risks
 - AI healthcare assistant that summarizes patient reports
 - AI real estate assistant that analyzes properties and generates listings
 - AI teacher assistant that builds lesson plans and grading rubrics
-

Track 5: AI Creative Studio (Content & Media Company)

Build an AI company that generates or enhances creative content. This is the “AI entertainment studio” track.

Examples:

- AI film generator that creates short movies from prompts
 - AI music studio that composes songs based on mood
 - AI game content generator that builds characters and storylines
 - AI influencer tool that creates social media posts and videos
-

Track 6: Choose Your Own AI Company

Build any AI startup idea that doesn't fit into the above tracks. This is for the most experimental, bold, or unconventional ideas.

Examples:

- AI marketplace where users hire AI agents for different tasks
- AI startup simulator that runs a company autonomously
- AI negotiation agent that helps users close deals
- AI life operating system that manages everything from emails to goals

Participant Rewards

Every participant will receive access to an incredible sponsor reward stack, including credits, tools, and free plans to help them build during and after the hackathon.

Participant Credits and Perks

- **Nebius + Tavily Bundle**
 - \$50 in tokens
 - \$50 in GPU credits
 - \$25 in Tavily credits
- **You.com**
 - \$100 in You.com credits for every participant

- **RocketRide**
 - RocketRide Cloud credits for every participant, plus a full build guide to get started: [Click here](#)
- **Nimble & Kylon**
 - Nimble: 5,000 free API credits per participant via <https://online.nimbleway.com/signup> — sign up, create an API key, and start building.
 - Kylon: Workspace access with credits for every team building on our track. https://app.kylon.io/c/q_rBaZ_kIMG8yUdV2FpilSm-rfosOZkj

Across our sponsor ecosystem, participants will receive access to **100K+ in credits, tools, and builder rewards** to help them summon their projects into reality. ✨

Prizes

Best Use of InsForge

Build something powerful using InsForge's agent-native cloud infrastructure.

- 🏆 1st Place — \$500
- 🥈 2nd Place — \$300
- 🥉 3rd Place — \$100

Best Use of Band

- 🏆 **Winning Team — \$500 cash**

Best Use of [You.com](#)

Use [You.com](#)'s Web Search APIs to build smarter AI systems, agents, research tools, workflows, or products with real-time, citation-backed search.

- 🏆 **Winning Team — \$1,000 in You.com credits**
- ⚙️ Best Use of Hydra DB
- 🏆 **Winning Team — 6 Months of HydraDB and tokens**
- ⚙️ Best Use of Rocket Ride
- 🏆 **Winning Team — \$500 Rocket Ride credits**
- ⚙️ GTM AI Employee Challenge
- 🏆 **Winning Team — Nimble: 50,000 Nimble API credits + \$250 USD Amazon gift card and Kylon: \$1,000 USD gift prize**

📅 Agenda

9:30 AM to 10.00 AM

Welcome and Opening Ceremony

10.00 AM to 11:00 AM

Theme Introduction, Sponsor Demos, and Inspiration Talks

11:00 AM to 5:00 PM

Hacking Sprint

5:00 PM to 6:00 PM

Submissions and Judging Round 1

6:00 PM to 7:00 PM

Finalist Demos

7:00 PM to 8:00 PM

Winners Announcement and Closing Ceremony

 Sponsors**InsForge**

InsForge is building agent-native cloud infrastructure for modern AI development. It brings together model gateway, compute, deployment, database, authentication, and more so AI coding agents can operate across the full development workflow.

Nebius

Nebius provides full-stack AI cloud infrastructure for developers, startups, enterprises, and research teams. Its platform helps teams build, train, and deploy AI products in a secure, high-performance, and cost-efficient environment.

Tavily

Tavily gives builders powerful search and research infrastructure for AI applications. It helps teams create agents, tools, and workflows that can access relevant web information and reason with better context.

AgentOS

AgentOS is an operating system for AI agents, built around runtime, observability, security, and evals. It helps teams build agents that are easier to trace, monitor, test, and deploy with more confidence.

You.com

You.com delivers leading Web Search APIs for AI systems. It powers applications that reason like experts and act through intelligent agents and workflows using real-time, citation-backed answers built on proprietary vertical and domain-specific web indices.

BAND

BAND is an enterprise-grade interaction layer that enables humans and AI agents to collaborate seamlessly. It provides real-time communication, built-in governance, and a structured framework for managing complex multi-agent systems securely and at scale.

Cognee

Cognee is an open-source memory platform for AI agents that transforms documents, relational data, and system context into persistent memory. It helps agents retain context across sessions and integrates seamlessly with tools like Claude Code, Codex, OpenClaw, and n8n.

Hydra DB

The serverless context infra built with in-memory data stores: ultra low latency, highest precision recall, and relationally-aware. Build memory layers, stateful agents, and context stores with the highest accuracy.

RocketRide

RocketRide is an open-source AI meta-harness: build, debug, and deploy AI workflows without leaving your IDE, then run them on [RocketRide Cloud](#). Cloud means a fraction of the cost, high performance at scale, zero infra, and shared pipelines for your team. Build straight on Cloud for this hack. Full guide: [Click here](#)

Nimble & Kylon

Nimble enables your AI agents and teams to stream the precise intelligence they need from the live web, powered by infrastructure built to reliably access even the most complex, difficult-to-reach data.

Kylon is an AI agent team that runs your entire business.

🤝 Partners

GoVia

GoVia is a technology platform dedicated to improving safety, transparency, and communication during police-community interactions. Through innovative tools and accessible resources, GoVia empowers individuals with information, support, and guidance to promote accountability, de-escalation, and informed decision-making.

Sublet

Sublet is a project submission and judging platform where participants can easily submit their projects and judges can review and score them in one place. It streamlines the evaluation process by allowing organizers to collect submissions, assign judges, and track scores efficiently, making hackathons and competitions more organized and transparent.

AWS Builders Loft

AWS Builders Loft is a community space and program by Amazon Web Services designed to support developers, startups, and builders working on cloud and AI-driven projects. It provides access to learning resources, hands-on workshops, technical sessions, and mentorship from AWS experts. Builders Loft also serves as a collaborative environment where founders and engineers can experiment with AWS tools, build prototypes, and connect with other innovators in the ecosystem.

Devnovate

Hosting amazing hackathons all over India and USA

Join the Discord

Join the Discord to connect with participants, find teammates, receive event updates, and stay informed throughout the hackathon.

Discord: <https://discord.gg/YhCdsBMxb>

Submit Your Project

Submit your project through our official submission platform before the deadline to be eligible for judging and prizes.

Submission Link: <https://sublet--saurabhskhire.replit.app/>

Event Terms & Consent

By registering, you agree to the event [terms and conditions](#). RocketRide reserves the right to refuse admission or remove attendees at its discretion to ensure a safe and high-quality experience for all guests.

Please note that photography and video recording will take place throughout the evening and may be used by RocketRide for future marketing, promotional, and community content.

Let's build something awesome together. 🖥️ ✨
