About Event

Rod Christensen, our Co-Founder and Chief Architect, has been CTO and Chief Architect at companies that built and shipped AI at real scale. This Wednesday, he sits down with our community to show you what we have been building.

Fred Jérémie, ANSH VERMA and 132 others

Report Event

AI

Not a keynote. Not a webinar. Not a slide deck. This is one of the most experienced AI infrastructure builders in the game, on-screen, showing you why RocketRide Cloud is defining a new category of Agentic AI in production, and taking your questions in real time.

Wednesday, August 5, 11:00 AM PT

Discord: [Join the RocketRide Discord Server!](#)

What you will see:

- Deployment flow: a full AI Ops pipeline. Your agent goes from local to cloud, in production.
- Replay, Pause, Rewind, Fast Forward: a DVR for your AI pipelines. See exactly what happened on any run, rewind it, replay it, and debug it. In production.
- App Store: build an end-to-end AI app on RocketRide Cloud, deploy it to the App Store, then plug in approvals, subscriptions, and billing. A preview of what ships this month. You are seeing it before anyone else.

If you have ever wanted to see what production AI infrastructure actually looks like, built by someone who has done it before, this is that session.

RocketRide Cloud is live: <https://cloud.rocketride.ai/>

RocketRide

RocketRide is an **open-source, developer-native AI meta-harness**. Build, debug, and deploy production AI workflows **within your IDE**, and **RocketRide Cloud** is a managed engine, the same runtime is operated for you. It runs your AI workflows at a fraction of the cost on our proprietary model server, scales without the infra hassle, and lets your whole team build on shared pipelines together.

Disclaimer: This session will be recorded and may be shared publicly. By joining, you consent to being recorded. If you prefer not to appear, feel free to keep your camera and mic off and use text chat for your questions.
