automation, this is your chance to create something real, learn from experienced builders, and

showcase your work to the wider RocketRide community. [Register Now](#) [About Our Partners](#) RocketRide is

an open-source, developer-native AI meta-harness. Build, debug, and deploy production AI workflows without leaving your IDE. And with RocketRide Cloud, teams can offload the complexity of AI infrastructure and focus on building solutions, with cost-efficient execution through our proprietary model server, shared pipelines for collaboration, higher performance, and seamless scalability. • 🎁 Free credits: We're giving away free credits for RocketRide Cloud, 100% off your first purchase with a promo code. Join the Discord to grab yours. • 📖 Step-by-step guide: Setup, demos, and how to build on RocketRide (Cloud + open-source). • 🚀 Submit your project: Post it in the #showcase channel on Discord. Make sure to include your project's GitHub link and all your .pipe files (import them from RocketRide Cloud). Need help? Just ask our bot in #support, whether it's about your project or the tools. Event Terms & Consent By registering, you agree to the event terms and conditions. RocketRide reserves the right to refuse admission or remove attendees at its discretion to keep things safe and enjoyable for everyone. Photography and video recording will take place throughout the evening and may be used by RocketRide for future marketing, promotional, and community content. By registering, you also consent to receiving the RocketRide newsletter and updates about future events at the email address you provide. You can unsubscribe anytime via the link in any email.

RocketRide Buildathon is a high-energy hackathon where student developers, designers, and innovators come together to turn ideas into shippable products. Build with modern AI tools, collaborate with your

peers, and pitch your project to mentors and industry leaders, all in a single sprint. Whether you're building a simple developer tool, full-stack apps, or intelligent automation, this is your chance to create something real, learn from experienced builders, and showcase your work to the wider RocketRide community.

👉 About Our Partners RocketRide is an open-source, developer-native AI meta-harness. Build, debug, and deploy production AI workflows right inside your IDE. And with RocketRide Cloud, teams can offload the complexity of AI infrastructure and focus on building solutions, with cost-efficient execution through our proprietary model server, shared pipelines for collaboration, higher performance, and seamless scalability.

- 🎁 Free credits: We're giving away free credits for RocketRide Cloud, 100% off your first purchase with a promo code. Join the Discord to grab yours.
- 📖 Step-by-step guide: Setup, demos, and how to build on RocketRide (Cloud + open-source).
- 🚀 Submit your project: Post it in the #showcase channel on Discord. Make sure to include your project's GitHub link and all your .pipe files (import them from RocketRide Cloud). Need help? Just ask our bot in #support, whether it's about your project or the tools.

Event Terms & Consent By registering, you agree to the event terms and conditions. RocketRide reserves the right to refuse admission or remove attendees at its discretion to keep things safe and enjoyable for everyone.

Photography and video recording will take place throughout the evening and may be used by RocketRide for future marketing, promotional, and community content. By registering, you also consent to receiving the RocketRide newsletter and updates about future events at the email address you provide. You can unsubscribe anytime via the link in any email.

RULES & GUIDELINES

- 1 Buildathon Mumbai is open to students and developers interested in building innovative technology solutions.
- 2 Registration on Devnovate is the first stage of the application process and does not guarantee participation in the offline hackathon.

⚠️ Registration is closed

Profile review may consider technical skills, previous projects, portfolio, GitHub profile, experience, achievements, and other information submitted during registration.

- 5 Final shortlisting for Buildathon Mumbai will be based on both participant profile review submission.
- 6 Only shortlisted teams will receive official confirmation to participate in the offline Buildathon Mumbai hackathon on 29th August 2026.
- 7 Registration confirmation does not constitute final selection for the offline hackathon.
- 8 The organizing team reserves the right to shortlist teams based on the overall quality of applications and available offline capacity.
- 9 Shortlisted teams may be required to confirm their participation before a specified deadline. Failure to confirm may result in the slot being offered to another shortlisted team.
- 10 Only officially shortlisted and confirmed participants will be permitted to enter the offline hackathon venue.
- 11 Participants must carry a valid college ID or government-issued identification for verification at the venue.
- 12 Participants must bring their own fully charged laptops, chargers, development accessories, and any other equipment required during the hackathon.
- 13 Teams must develop and submit their final solution within the official 6-hour hackathon duration.
- 14 Participants may use open-source libraries, APIs, frameworks, cloud platforms, AI tools, developer tools, and publicly available resources unless specifically restricted during the hackathon briefing.
- 15 Pre-built complete projects cannot be submitted as hackathon entries. Meaningful development and implementation of the solution must take place during the official hackathon.

! Registration is closed

technology stack before the event.

All teams must submit their final project before the announced submission deadline to be eligible for evaluation.

- 18 Final submissions may include a source code repository, working prototype, project description, presentation, demo, and any other materials requested by the organizing team.
- 19 Teams may be required to demonstrate their working solution and explain their architecture, implementation, technology choices, and impact to the judging panel.
- 20 Projects may be evaluated based on innovation, technical implementation, functionality, feasibility, impact, usability, scalability, presentation, and overall execution.
- 21 Any form of plagiarism, submission of an existing complete project, misrepresentation, or violation of event guidelines may result in disqualification.
- 22 Participants are expected to maintain respectful, professional, and ethical behavior throughout the event.
- 23 The decisions of the judging panel regarding project evaluation and winners will be final.
- 24 The organizing team reserves the right to modify the schedule, rules, shortlisting process, judging criteria, venue, prize structure, or event format when necessary.
- 25 By registering for Buildathon Mumbai, participants agree to follow all rules, guidelines, and official communications issued by HackwithIndia, Devnovate, and the BuildX Mumbai organizing team.
