About Event

SF Enterprise Hackathon

Join us for the **SF Enterprise Hackathon**, an exclusive one-day hackathon designed for **working professionals** building the next generation of enterprise AI. Connect with engineers, founders, product leaders, and AI practitioners from leading startups and enterprises to solve real-world business challenges.

Whether you're building AI agents, developer tools, enterprise workflows, or AI infrastructure, this is your opportunity to collaborate with some of the best talent in San Francisco and showcase your ideas to industry leaders.

Event Details

When: 9:30 AM – 7:00 PM, 14th August 2026

Where: San Francisco (Restricted to Guests)

Who: Software Engineers, AI Engineers, Product Managers, Founders, Data Scientists, and other working professionals

Theme: Enterprise AI & Intelligent Agents

What to Expect

- An 8-hour enterprise-focused hackathon
- Build AI solutions for real business problems
- Collaborate with experienced professionals and founders
- Access to mentors from leading AI and enterprise companies
- Networking with engineering and product leaders
- Live project demos to judges and industry experts
- Exclusive swag, food, and refreshments
- Exciting prizes and sponsor awards

Whether you're building AI copilots, enterprise agents, developer tools, workflow automation, or infrastructure for modern businesses, this is your chance to create impactful products alongside San Francisco's enterprise AI community.

About Our Partners

RocketRide

[RocketRide](#) is an open-source, developer-native AI meta-harness. Build, debug, and deploy production AI workflows right inside your IDE. And with [RocketRide Cloud](#), teams can offload the complexity of AI infrastructure and focus on building solutions, with cost-efficient execution through our proprietary

model server, shared pipelines for collaboration, higher performance, and seamless scalability.

- 🎁 **Free credits:** We're giving away free credits for RocketRide Cloud, 100% off your first purchase with a promo code. Join the [Discord](#) to grab yours.
- 📖 **Step-by-step guide:** Setup, demos, and how to build on RocketRide (Cloud + open-source): [click here](#)
- 🚀 **Submit your project:** Post it in the #showcase channel on [Discord](#). Make sure to include your project's GitHub link and all your .pipe files (import them from RocketRide Cloud). Need help? Just ask our bot in #support, whether it's about your project or the tools.

Let's build something awesome together. 💻✨

[Snyk](#)

Snyk is a developer-first cybersecurity platform that helps teams build fast without compromising on security. As developers rely heavily on AI to write code at unprecedented speeds, Snyk continuously scans and secures application code, open-source dependencies, containers, and cloud environments right within the developer's workflow. For an AI hackathon, **it matters** because shipping code quickly with AI generators or autonomous agents also means shipping security risks at machine speed. Snyk acts as an intelligent security layer, catching vulnerabilities and automatically applying verified fixes in real time—allowing builders to ship ambitious AI projects safely and with complete confidence.

At this event you will learn:

- 1) [Sign-up for free \(no credit card required\)](#), how to import your code, and configure your AI coding tool
- 2) Free [AI Security Engineer Foundations Certificate](#)

Event Terms & Consent

By registering, you agree to the event [terms and conditions](#). RocketRide reserves the right to refuse admission or remove attendees at its discretion, to keep things safe and enjoyable for everyone.

Photography and video recording will take place throughout the evening and may be used by RocketRide for future marketing, promotional, and community content. By registering, you also consent to receiving the RocketRide newsletter and updates about future events at the email you provide. You can unsubscribe anytime via the link in any email.

Spots are limited. Register now and build the future of Enterprise AI.
